

MD. FARDIN HOSSAIN

Computer Science and Engineering Student | Aspiring Software Engineer and AI Enthusiast

01992748470 | fardin.hosn@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Computer Science and Engineering student with hands-on experience in full-stack web development and AI applications. I build scalable web applications using the MERN stack and have experience with machine learning and cybersecurity projects. Passionate about integrating advanced technologies to solve real-world problems and continuously expanding my skills in software engineering.

EDUCATION

Bachelor of Science (B.Sc.) in Computer Science and Engineering

Southeast University

07/2023 - Present | Tejgaon, Dhaka, Bangladesh

SKILLS

Programming Languages

[Python] [Java] [C/C++] [JavaScript]

Web Development

[React] [Next.js] [Node.js] [Express.js] [HTML] [CSS] [Tailwind CSS]

Databases, Cloud & DevOps

[MongoDB] [Firebase (Google Firebase)]

AI / ML

[Pytorch] [Machine Learning] [Deep Learning]

Tools & Others

[Git] [GitHub] [REST API] [Postman] [Vercel] [Linux]

Cyber Security

[Penetration Testing] [Web Security] [OWASP Top 10] [API Security]

LANGUAGES

Bengali (Native) | English (Proficient)

COURSES / TRAINING

- Complete full-Stack Development Bootcamp
- IBM Generative AI Engineering Professional
- AI Engineer for Developers Associate Certification- Datacamp
- Google Cloud Certifications
- Applied Penetration Testing Engineer: Hands-on(EDGE-CUET)

CERTIFICATIONS

- AI Engineer for Developers Associate Certification- (Datacamp)
- C/PTE: Certified Penetration Testing Engineer(mile2 Cybersecurity Certifications)
- Google Cloud Certifications
- IBM Generative AI Engineering Professional Certificate

STRENGTHS

Problem Solving | Fast Learner | Team Player | Detail Oriented

KEY ACHIEVEMENT

Full-Stack Application Development

Built and deployed multiple full-stack applications using modern web technologies.

AI-Powered Solutions

Developed AI-powered software solutions integrating Large Language Models.

Collaborative Development

Experienced with Git-based collaborative workflows and agile development practices.

PROJECTS

LocationKhuij - AI-Powered Location Discovery Platform

06/2026 - Present

[Github_LocationKhuij](#)

- Designed and developed a full-stack AI-powered location search platform for discovering businesses and services across Bangladesh.
- Implemented intelligent natural language search using LLM-based query understanding and location extraction.
- Built multi-layer AI fallback architecture to improve search reliability and user experience.
- Integrated geolocation services, map visualization, and location-aware recommendations.
- Developed RESTful APIs and optimized database queries for efficient search performance.

UniBuddy - University Student Collaboration Platform

09/2025 - 10/2025

[Github_UniBuddy](#)

- Developed a student-focused collaboration platform for communication and academic assistance.
- Implemented authentication, user profiles, and interactive features for student engagement.
- Designed responsive user interface and scalable backend architecture.

Skin Disease Classification

02/2026 - 03/2026

[Github_SDC](#)

- Built a deep learning model for automated skin disease classification using Transfer Learning.
- Applied transfer learning techniques to improve model performance and training efficiency.
- Performed dataset preprocessing, augmentation, and evaluation.

Cybersecurity Security Assessment Project

04/2026 - 05/2026

[Github_CSA](#)

- Conducted cybersecurity assessments and vulnerability analysis activities.
- Applied security best practices and risk assessment methodologies.
- Documented findings and provided recommendations professionally.
